Table of Contents

Edward Teller's Statement (1989).....	xv
Introduction.....	xix
1. A Science Controversy Like No Other	1
2. Unfriendly Competition or Scientific Piracy?.....	13
3. Not Even a Watt.....	31
4. Send Lawyers, Heavy Water and Money	45
5. The News Heard Round the World	59
6. The Case of the Missing Lab Books.....	73
7. The Man Behind the Curtain	79
8. A Pleasant Break in Europe	87
9. Cold Fusion Frenzy	101
10. Meeting of the Minds	119
11. Problems and Possibilities	137
12. The Woodstock of Chemistry	151
13. The Bets Are Placed	163
14. Chemists Shill for Utah.....	179
15. Inside the Atom	195
16. Accused of Fraud	201
17. Twin Peaks Over Salt Lake City	207

18. Backlash in Baltimore.....	227
19. "Incompetence and Delusions"	241
20. Judgment and Verdict	253
21. Death, Aftermath and Reflection	269
22. The Press Conference From Hell	287
23. India Advances Again.....	311
23. Spaghetti Fusion	325
24. Nothing to See — Move Along.....	335
25. Hired Hands	341
26. A Tale of Two Telescopes	353
27. Charting Their Own Course	361
28. Sweep It Under the Rug.....	375
29. Could We Do Without This?.....	389
30. Showdown in the Scientific Corral	405
31. Panel Prepares Burial.....	417
33. Paradigm Paralysis.....	435
34. Not With a 10-Foot Pole	453
Glossary of Scientific Terms	473
Appendix A — Definition of Low-Energy Nuclear Reactions....	481
Appendix B — Timeline of Related 20th Century Events.....	483
Appendix C — Timeline of Early "Cold Fusion" History	485
Appendix D — Basic Types of Radioactive Emissions.....	499

Appendix E — Helium Permeation in Metals Analysis	501
Appendix F — ERAB Panel Members and Meetings	503
Bibliography.....	505
Index.....	511
About the Author	533
Other Volumes in This Series	534

About the Author

Steven B. Krivit lives in San Rafael, California, and is an investigative science journalist and international speaker. He studied industrial design at the University of Bridgeport (Connecticut) and completed his bachelor's degree in business administration and information technology at National University (Los Angeles). He was a computer network systems engineer until 2000, when he became curious about low-energy nuclear reaction (LENR) research. He founded the

New Energy Times Web site and online news service to share what he learned. By 2016, he had spoken with nearly all the scientists who were involved in the field. He has lectured nationally and internationally to scientific as well as lay audiences. He has advised the U.S. intelligence community, the U.S. Library of Congress, members of the Indian Atomic Energy Commission and the interim executive director of the American Nuclear Society. He is the leading author of review articles and chapters about LENRs, including invited papers for the Royal Society of Chemistry (2009), Elsevier (2009 and 2013) and John Wiley & Sons (2011). He was an editor for the American Chemical Society 2008 and 2009 technical reference books on LENRs and editor-in-chief for the 2011 Wiley *Nuclear Energy Encyclopedia*.

Krivit was the first science journalist to publicly identify and teach the distinctions between the unproven theory of "cold fusion" and the experimentally confirmed neutron-catalyzed LENRs. He did so in 2008 at the 236th national meeting of the American Chemical Society. His chapters in the *Elsevier Encyclopedia of Electrochemical Power Sources* were the first chapters on LENRs in a print encyclopedia.

Other Volumes in This Series

Hacking the Atom: Explorations in Nuclear Research, Vol. 1

This book shows, for the first time, why low-energy nuclear reaction phenomena are not the result of fusion, why they are the result of nuclear processes, and why they can now be explained by a feasible theory. The theory does not conflict with existing physics but expands scientific knowledge and reveals a new field of nuclear science.

Lost History: Explorations in Nuclear Research, Vol. 3

This book explores the story of forgotten chemical transmutation research during the 1910s and 1920s, a precursor to modern low-energy nuclear reactions research. This work has been obscured and absent in the dialogue of the scientific community for a century.
