## Overview of Regional Licensing Opportunities

Qualified parties will receive licenses to manufacture, distribute, sell, and service Edison Devices within the borders of a specific sovereign nation. Licensees can apply for and receive additional licenses to address the markets of more than one nation, provided that certain requirements are met. All Edison Devices must be manufactured, distributed, sold and serviced by licensees within the nation for which the license is granted with the exception of gCells, eCells and water treatment related components, which will be supplied by Genesis World Energy and its partners from facilities within the United States.

## Licensing Period

Once a license is granted, it remains in affect without limitation, for as long as the licensee remains in compliance with the terms of the licensing agreement.
