Final Steps to Complete the Licensing Process

1. Potential licensees will be required to sign a non-disclosure agreement.
2. You will be provided with a copy of the proposed licensing agreement.
3. Related to the manufacture and validation of the technology you will be provided with:
 - a. Basic product specifications that include possible energy output configurations, general manufacturing, and assembly process information that may be used to establish costing information.
 - b. Independent laboratory test results related to the energy outputs of operating gCells, eCells and standard configuration Edison Devices.
 - c. The ability to view operating devices supplying energy to homes and businesses on a long-term basis.
 - d. The ability to have your own experts review the operation of standard configuration Edison Devices.
4. Upon your acceptance of the terms of the license agreement and your execution of the financing note related to the license fee, you will be provided with operating Edison Devices, which represent the configurations of the models you wish to market. The operating Edison Devices you will be provided are intended to serve as specification guide standards, and shall form the basis of the production specifications of the devices you intend to produce.
