Special Notes

1. Licensee Satisfaction:
In the event that you have entered into a License Agreement and you feel the Edison Device fails to operate as advertised, you will have the ability to cancel the License Agreement without financial obligation.
2. Usage Laws and Consumer Certifications:
Because all licensees have the right to custom configure Edison devices to meet the needs of their target market, it will be the responsibility of each licensee to obtain any and all related product approvals required by local law or codes, where required. Licensees shall also assume the responsibility for obtaining Underwriter's Laboratories or other consumer related certifications.
3. Restricted Use:
Each Edison Device is designed to operate only within the borders of the sovereign nation in which it was originally assembled and sold. Moving the Edison Device beyond its intended area of licensed operation will render it immediately and permanently useless.
4. Licensee Provided Production Samples:
Manufacturing licensees will be required to provide Genesis World Energy one production sample of each model per month for quality assurance evaluation.
