CONTENTS

Foreword	xvii
I. Excess Heat and Calorimetry	
Fleischmann, M.	1
<i>Background to cold fusion: The genesis of a concept</i>	
Szpak, S., P. A. Mosier-Boss, J. Dea and F. Gordon	13
<i>Polarized D⁺/Pd-D₂O system: Hot spots and mini-explosions</i>	
Miles, M. H.	23
<i>Fluidized bed experiments using platinum and palladium particles in heavy water</i>	
Swartz, M. R. and G. M. Verner	29
<i>Excess heat from low-electrical conductivity heavy water spiral-wound Pd/D₂O/Pt and Pd/D₂O-PdCl₂/Pt devices</i>	
Swartz, M. R.	45
<i>Can a Pd/D₂O/Pt device be made portable to demonstrate the optimal operating point?</i>	
Wei, Q. M., X. Z. Li and Y. O. Cui	55
<i>Excess heat in heavy water-Pd/C catalyst cathode (Case-type) electrolysis at the temperature near the boiling point</i>	
Dardik, I., H. Branover, A. El-Boher, D. Gazit, E. Golbreich, E. Greenspan, A. Kapusta, B. Khachatorov, V. Krakov, S. Lesin, B. Michailovitch, G. Shani and T. Zilov	61
<i>Intensification of low energy nuclear reactions using superwave excitation</i>	
Mizuno, T., T. Ohmori and T. Akimoto	73
<i>Generation of heat and products during plasma electrolysis</i>	
Tsvetkov, S. A., E. S. Filatov and V. A. Khokhlov	89
<i>Excess heat in molten salts of (LiCl - KCl) + (LiD + LiF) at the titanium electrode during electrolysis</i>	

Karabut, A. B.	99
<i>Production of excess heat, impurity elements and unnatural isotopic ratios in high-current glow discharge experiments</i>	
Li, X. Z., B. Liu, N. N. Cai, Q. M. Wei, J. Tian and D. X. Cao	113
<i>Progress in gas-loading D/Pd system: The feasibility of a self-sustaining heat generator</i>	
Heat and ^4He	
Miles, M. H.	123
<i>Correlation of excess enthalpy and helium-4 production: A review</i>	
De Ninno, A., A. Frattolillo, A. Rizzo and E. Del Giudice	133
<i>^4He detection in a cold fusion experiment</i>	
Arata, Y. and Y. C. Zhang	139
<i>Development of compact nuclear fusion reactor using solid pycnodeuterium as nuclear fuel</i>	
Triggering	
Letts, D. and D. Cravens	159
<i>Laser stimulation of deuterated palladium: Past and present</i>	
Cravens, D. J. and D. G. Letts	171
<i>Practical techniques in CF research: Triggering methods</i>	
Storms, E.	183
<i>Use of a very sensitive Seebeck calorimeter to study the Pons-Fleischmann and Letts effects</i>	
McKubre, M., F. Tanzella, P. L. Hagelstein, K. Mullican and M. Trevithick	199
<i>The need for triggering in cold fusion reactions</i>	
Swartz, M. R.	213
<i>Photo-induced excess heat from laser-irradiated electrically polarized palladium cathodes in D_2O</i>	
Liu, B., X. Z. Li, L. Ge and L. Yan	227
<i>Triggering a deuterium flux in Pd wire using an electromagnetic field</i>	

Cavitation

- Stringham, R. S. 233
Cavitation and fusion

Calorimetry

- Fleischmann, M. and M. H. Miles 247
The instrument function of isoperibolic calorimeters: Excess enthalpy generation due to the parasitic reduction of oxygen
- Storms, E. 269
How to make a cheap and effective Seebeck calorimeter
- Hansen, W. N., G. J. Hansen and D. Glenn 273
Analysis of some electrochemical calorimetry data

Related Topics

- Storms, E. 285
What conditions are required to initiate the LENR effect?
- Nagel, D. J. and M. A. Imam 291
Energetics of defects and strains in palladium
- Hagelstein, P. L. 305
Thermal to electric energy conversion
- Gimpel, R. F. 315
MultiCell reactors

II. Tritium Production

- Romodanov, V. A. 325
Tritium generation from the interaction of a glow discharge plasma with metals and a magnetic field
- Afonichev, D. D. 353
High-frequency radiation and tritium channel

III. Transmutation

Miley, G. H. and P. J. Shrestha	361
<i>Review of transmutation reactions in solids</i>	
Celani, F., A. Spallone, E. Righi, G. Trenta, C. Catena, G. D'Agostaro, P. Quercia, V. Andreassi, P. Marini, V. di Stefano, M. Nakamura, A. Mancini, P. G. Sona, F. Fontana, L. Gamberale and D. Garbelli, F. Falcioni, M. Marchesini, E. Novaro and U. Mastromatteo	379
<i>Thermal and isotopic anomalies when Pd cathodes are electrolyzed in electrolytes containing Th-Hg salts dissolved at micromolar concentration in C_2H_5OD/D_2O mixtures</i>	
Passell, T. O.	399
<i>Pd-110/108 ratios and trace element changes in particulate palladium exposed to deuterium gas</i>	
Violante, V., G. Mazzitelli, L. Capobianco, M. McKubre, F. Tanzella, F. Sarto, E. Santoro and C. Sibilia	405
<i>Search for nuclear ashes in electrochemical experiments</i>	
Violante, V., E. Castagna, C. Sibilia, S. Paoloni and F. Sarto	421
<i>Analysis of Ni-hydride thin film after surface plasmon generation by laser technique</i>	
Iwamura, Y., T. Itoh, M. Sakano, S. Sakai and S. Kurabayashi	435
<i>Low energy nuclear transmutation in condensed matter induced by D_2 gas permeation through Pd complexes: Correlation between deuterium flux and nuclear products</i>	
Higashiyama, T., H. Miyamaru, A. Takahashi and M. Sakano	447
<i>Replication of MHI transmutation experiment by D_2 gas permeation through Pd complex</i>	
Yamada, H., S. Narita, H. Onodera, H. Suzuki, N. Tanaka, T. Nyui and T. Ushirozawa	455
<i>Analysis by time-of-flight secondary ion mass spectroscopy for nuclear products in hydrogen penetration through palladium</i>	
Dash, J. and D. Chicea	463
<i>Changes in the radioactivity, topography, and surface composition of uranium after hydrogen loading by aqueous electrolysis</i>	
Chicea, D.	475
<i>Comment on carbon production in deuterium-metal systems</i>	

Afonichev, D. D.	483
<i>Ascending diffusion or transmutation</i>	
Tsvetkov, S. A.	487
<i>Possibility of using of cold fusion for the transmutation of nuclear waste products</i>	
Adamenko, S. V. and V. I. Vysotskii	493
<i>Experimental observation and a possible way to the create anomalous isotopes and stable superheavy nuclei via electron-nucleus collapse</i>	
III. Radiation	
Keeney, F. W., S. E. Jones, A. C. Johnson, P. L. Hagelstein, G. Hubler, D. B. Buehler, F. E. Cecil, M. R. Scott and J. E Ellsworth	509
<i>Charged-particle emissions from deuterided metals</i>	
Keeney, F. W., S. E. Jones, A. C. Johnson, P. L. Hagelstein, G. Hubler, D. B. Buehler, F. E. Cecil, M. R. Scott and J. E Ellsworth	525
<i>Neutron emissions from deuterided metals</i>	
Cecil, F. E., H. Liu and C. S. Galovich	535
<i>Energetic charged particles from deuterium metal systems</i>	
Lipson, A. G., G. H. Miley, A. S. Roussetski and E. I. Saunin	539
<i>Phenomenon of an energetic charged particle emission from hydrogen/deuterium loaded metals</i>	
Roussetski, A. S., A. G. Lipson and V. P. Andrianov	559
<i>Nuclear emissions from titanium hydride/deuteride induced by powerful picosecond laser beam</i>	
Oriani, R. A. and J. C. Fisher	567
<i>Energetic charged particles produced in the gas phase by electrolysis</i>	
Oriani, R. A. and J. C. Fisher	577
<i>Detection of energetic charged particles during electrolysis</i>	
Karabut, A. B. and S. A. Kolomeychenko	585
<i>Experiments characterizing the x-ray emission from a solid-state cathode using a high-current glow discharge</i>	

Karabut, A. B.	597
<i>Experimental research into secondary penetrating radiation when x-ray beams of solid laser interact with various target materials</i>	
Narita, S., H. Yamada, A. Arapi, N. Sato, D. Kato, M. Yamamura and M. Itagaki	603
<i>Gamma-ray detection and surface analysis on a palladium electrode in a dc glow-like discharge experiment</i>	
McIntyre, R.	611
<i>Proposal for an experiment designed to seek evidence for cold fusion</i>	
Jones, S. E. and J. E. Ellsworth	617
<i>Cold (metal-enhanced) fusion, geo-fusion and cold nucleosynthesis</i>	

IV. Beam Experiments

Kitamura, A., Y. Awa, T. Minari, N. Kubota, A. Taniike and Y. Furuyama ..	623
<i>D(d,p)t reaction rate enhancement in a mixed layer of Au and Pd</i>	
Lipson, A. G., G. H. Miley, A. S. Roussetski and A. B. Karabut	635
<i>Strong enhancement of dd-reaction accompanied by x-ray generation in a pulsed low voltage high-current deuterium glow discharge with a titanium cathode</i>	
Takahashi, A., H. Miyamaru, K. Ochiai, Y. Katayama, T. Hayashi and T. Dairaku	657
<i>Studies on 3D fusion reactions in TiD_x under ion beam implantation</i>	

V. Theory

Screening

Violante, V., G. Mazzitelli, L. Capobianco, F. Sarto, E. Santoro, M. McKubre, F. Tanzella, G. H. Miley, N. Luo, P. J. Shrestha, and C. Sibilia	667
<i>Study of lattice potentials on low-energy nuclear processes in condensed matter</i>	
Kirkinskii, V. A. and Yu. A. Novikov	681
<i>Calculations of nuclear reaction probabilities in a crystal lattice of titanium deuteride</i>	

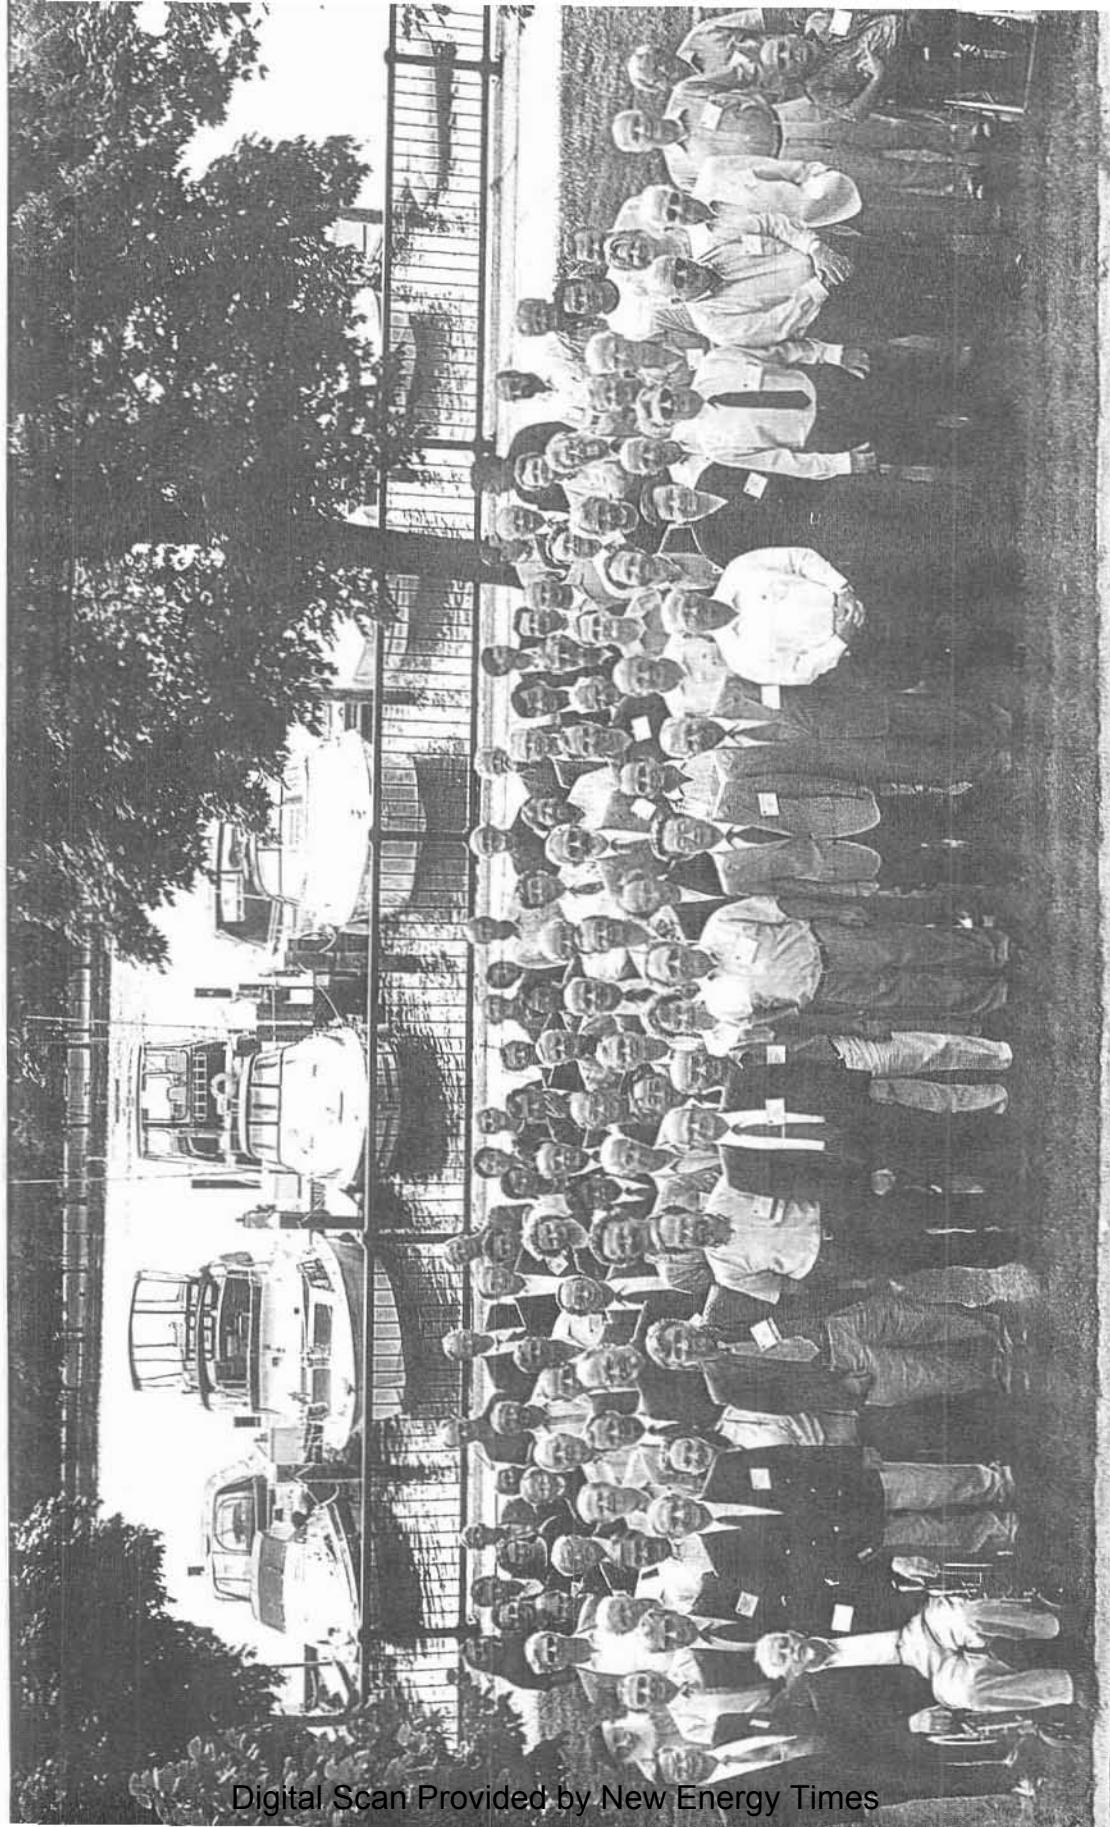

Luo, N., P. J. Shrestha and G. H. Miley and V. Violante	687
<i>Enhancement of nuclear reactions due to screening effects of core electrons</i>	
Frisone, F.	695
<i>Fusion reaction within a microcrack with cubic lattice structure at low energy and study of the non semi-classical tunneling</i>	
Takahashi, H.	703
<i>Quantum field theory, and screening the Coulomb potential by mobile deuterons for the low-energy nuclear reaction</i>	
Luo, N. and G. H. Miley	709
<i>First-principles studies of ionic and electronic transport in palladium hydride</i>	
 Resonant Tunneling	
Chen, S. and X. Z. Li	717
<i>The application of multiple scattering theory in calculating the deuterium flux permeating a Pd thin film</i>	
Zhou, X., X. Z. Li and B. Liu	729
<i>Bethe's calculation for solar energy and selective resonant tunneling</i>	
 Ion Band States	
Chubb, S. R.	735
<i>Nuts and bolts of the ion band state theory</i>	
Chubb, T. A.	753
<i>The dd cold fusion-transmutation connection</i>	
Chubb, T. A.	767
<i>LENR: Superfluids, self-trapping and non-self-trapping states</i>	
Chubb, S. R.	771
<i>Impact of boundary effects involving broken gauge symmetry on LENR's</i>	
 Bose-Einstein Condensate Approach	
Kim, Y. E., D. S. Koltick and A. L. Zubarev	779
<i>Quantum many-body theory of low energy nuclear reaction induced by acoustic cavitation in deuterated liquid</i>	

Kim, Y. E., D. S. Koltick, R. Prenger, J. Myers and R. Koltick	789
<i>Experimental test of Bose-Einstein condensation mechanism for low energy nuclear reaction in nanoscale atomic clusters</i>	
Tsuchiya, K.-I.	801
<i>Quantum states of deuterons in palladium</i>	
Multibody Fusion	
Takahashi, A.	809
<i>Mechanism of deuteron cluster fusion by EQPET model</i>	
Ohta, M. and A. Takahashi	819
<i>Analysis of nuclear transmutation induced from metal plus multibody-fusion-products reaction</i>	
Engvild, K. C. and L. Kowalski	825
<i>Triple deuterium fusion by three-body recombination between deuteron and the nuclei of lattice trapped deuterium molecules</i>	
Preparata Theory	
Del Giudice, E., A. De Ninno and A. Frattolillo	831
<i>Are nuclear transmutations observed at low energies consequences of QED coherence?</i>	
Phonon Coupling	
Hagelstein, P. L.	837
<i>Unified phonon-coupled SU(N) models for anomalies in metal deuterides</i>	
Hagelstein, P. L.	871
<i>Resonant tunneling and resonant excitation transfer</i>	
Chaudhary, I. and P. L. Hagelstein	887
<i>Few-body nuclear wave functions</i>	
Chaudhary, I. and P. L. Hagelstein	903
<i>Coherence factors in many-particle three-level systems</i>	

Neutron Clusters	
Fisher, J. C.	915
<i>Theory of low-temperature particle showers</i>	
Kozima, H.	919
<i>CF-matter and the cold fusion phenomenon</i>	
Other	
Vysotskii, V. I., A. A. Kornilova, Y. D. Perfiliev and L. A. Kulikov	929
<i>The theory and experimental investigation of controlled spontaneous conversion nuclear decay of radioactive isotopes</i>	
Campbell, C. K.	937
<i>The cold fusion phenomenon: A hypothesis</i>	
VI. Other Topics	
Rothwell, J. and E. Storms	939
<i>The LENR-CANR.org website: Its past and future</i>	
Kowalski, L.	943
<i>Teachers debate cold fusion</i>	
Kowalski, L.	953
<i>The dilemma of a physics teacher</i>	
Lewis, E. H.	959
<i>"Cold fusion" may be part of a scientific revolution</i>	
Lewis, E. H.	973
<i>The ball lightning state in cold fusion</i>	
Mallove, E. F.	983
<i>LENR and "cold fusion" excess heat: Their relation to other anomalous microphysical energy experiments and emerging new energy technologies</i>	

VII. Post-Deadline Papers

Bass, R. W. and M. C. H. McKubre	1005
<i>Generalized cause and effect demonstration protocol</i>	
Bass, R. W.	1009
<i>Optimal laser wavelength for resonant transmission through the Coulomb barrier</i>	
Author Index	1015
