Acknowledgment	ix

INTRODUCTION

Hot and Cold Fusion for Energy Generation	1
D. J. Nagel	

OVERVIEW

What Is Real about Cold Fusion and What Explanations Are Plausible?	20
E. Storms and B. Scanlan	
Cold Fusion, LENR, CMNS, FPE: One Perspective on the State of the Science Based on Measurements Made at SRI	36
M. C. H. McKubre and F. L. Tanzella	

EXCESS HEAT/POWER AND CALORIMETRY

Measurements of Excess Power Effects in Pd/D₂O Systems Using a New Isoperibolic Calorimeter	51
M. H. Miles and M. Fleischmann	
Heat Evolution from Pd Nanopowders Exposed to High-pressure Hydrogen Isotopes and Associated Radiation Measurements	66
A. Kitamura, A. Takahashi, Y. Sasaki, Y. Miyoshi, A. Taniike, R. Seto, and Y. Fujita	
Absorption Capacity and Heat Evolution with Loading of Hydrogen Isotope Gases for Pd Nanopowder and Pd/Ceramics Nanocomposite	81
T. Hioki, H. Azuma, T. Nishi, A. Itoh, S. Hibi, J. Gao, T. Motohiro, and J. Kasagi	
Codeposition Methods: A Search for Enabling Factors	93
D. Letts	
Impact of an Applied Magnetic Field on a High Impedance Dual Anode LANR Device	108
M. R. Swartz	
Detection of Abnormal Quantity of Hydrogen upon Electrical Explosion of Titanium Foil in a Liquid	123
L. I. Urutskoev, D. V. Filippov, A. A. Rukhadze, and L. A. Lebedev	
Studies on Anomalous Phenomena of D/Pd Systems Using a Gas-loading Process—A Stride towards Neutrino Detection	137
Z. M. Dong, C. L. Liang, B. Liu, Q. M. Wei, J. Tian, S. X. Zheng, J. Z. Yu, and X. Z. Li	

NUCLEAR TRANSMUTATION AND NUCLEAR ASH

Observation of Low Energy Nuclear Transmutation Reactions Induced by Deuterium Permeation through Multilayer Pd and CaO Thin Film	153
Y. Iwamura, T. Itoh, N. Yamazaki, J. Kasagi, Y. Terada, T. Ishikawa, D. Sekiba, H. Yonemura, and K. Fukutani	
Low-energy Nuclear Reactions and Transmutation of Stable and Radioactive Isotopes in Growing Biological Systems	168
V. I. Vysotskii and A. A. Kornilova	
Neutron Emission in Bursts and Hot Spots: Signature of Micro-nuclear Explosions?	183
M. Srinivasan	
Review of Twenty Years of LENR Research Using Pd/D Co-Deposition	196
P. A. Mosier-Boss, L. P. G. Forsley, F. E. Gordon, J. Y. Dea, and M. H. Miles	

MATERIALS SCIENCE BEHIND THE FLEISCHMANN PONS EFFECT

Material Science behind the Fleischmann and Pons Effect	213
V. Violante, F. Sarto, E. Castagna, S. Lecci, G. Hubler, D. Knies, K. Grabowski, M. McKubre, F. Tanzella, and T. Zilov	
The Role of Cathode's Surface Properties in Electrochemical Excess Heat Experiments	225
F. Sarto, E. Castagna, S. Lecci, and V. Violante	

THEORETICAL APPROACH

Bose-Einstein Condensate Theory of Deuteron Fusion in Metal	234
Y. E. Kim	
Energy Exchange Using Spin-Boson Models with Infinite Loss	251
P. L. Hagelstein and I. U. Chaudhary	
Concerning the Role of Electromagnetism in Low-energy Nuclear Reactions	265
S. R. Chubb	
Weight of Evidence for the Fleischmann—Pons Effect	280
R. Johnson and M. Melich	
Tunneling beneath the ${}^4\text{He}^*$ Fragmentation Energy	295
A. Meulenberg and K. P. Sinha	
Ultra-high Density Deuteron-Cluster Electrode for Low-energy Nuclear Reactions	313
G. H. Miley, X. Yang, and H. Hora	
Progress in Condensed Cluster Fusion Theory	328
A. Takahashi	
Inhibition of LENR by Hydrogen within Gas Loaded Systems	343
D. Cravens	
Dynamics in Pd-H(D) Systems	354
A. De Ninno	

SONOFUSION

Model for Sonofusion	369
R. S. Stringham	
Author Index	385
