The Centenary of Transmutation

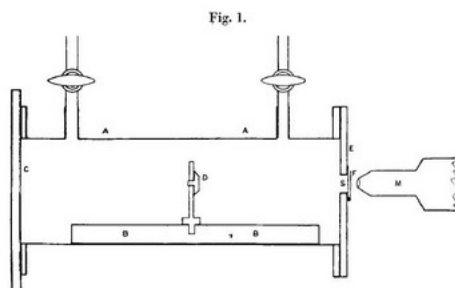

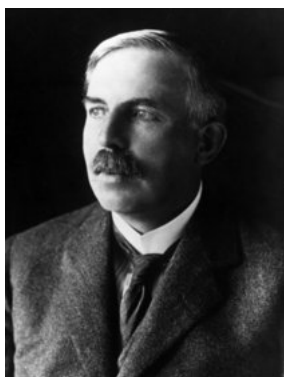

8 June 2019, The University of Manchester, Manchester, UK

Home

Centenary of Transmutation, Manchester June 2019 – a meeting to mark 100 years since publication of “Collision of α -particles with light atoms: I, II, III, IV”, by Ernest Rutherford, June 1919.

Organised by N Todd and P Rowlands.

A one day meeting to celebrate the centenary of Rutherford's discovery of artificial transmutation by collision of alpha-particles with nitrogen. The meeting will feature a series of lectures and a tour of the old laboratories where Rutherford carried out his work during World War I.
