Subject: Professor Taleyarkhan's teaching and committee assignments

I am sending this message to answer questions that have arisen about Professor Taleyarkhan's teaching and committee assignments for the Fall 2006 semester.

- Professor Taleyarkhan's teaching assignment is to be the same as it has been in recent fall semesters: ENGR103 and NUCL597R/553. The offering of NUCL597 is, as always, subject to there being sufficient enrollment to offer the course. The enrollment requirements are to be the same as for other courses in NE. I wish to be notified in advance if it appears that the course will be cancelled for lack of enrollment.

- Professor Taleyarkhan's committee assignments are to be the same as they were in the 2005-06 academic year. In particular, he is to remain a member of the Graduate Committee.

I trust that these assignments will be carried out.

leah
