## FINAL DEMAND

Dear Dick,

In your email to myself, Founder and Trustee of Byron New Energy Charitable Trust on Thursday 22 December 2011 you stated:

"If I invented such an incredible machine, I would make sure I would get a simple report from someone who is quite independent to say that it actually works. Can you send me a copy of this and I will send off the cheque?"

I accepted your written offer on the same day, and supplied the 'simple report from someone who is quite independent to say that it actually works' on the same day.

This simple report is in fact an 'Experimental test of a mini-Rossi device at the Leonardocorp, Bologna 29 March 2011. The Participants were: Giuseppe Levi, David Bianchini, Carlo Leonardi, Hanno Essen, Sven Kullander, Andrea Rossi, Sergio Focardi. The report was written by Professor Sven Kullander is the Chairman of the Science Academy of Sweden and Professor Emeritus of the University of Uppsala (Sweden) and Hanno Essen is Professor of Nuclear Engineering at the University of Stockholm (Sweden). Professor Essen is also a past Chairman of the Sceptics Society of Sweden.

(you can download the report from <http://www.nyteknik.se/incoming/article3144960.ece/BINARY/Download+the+report+by+Kullander+and+Ess%C3%A9n+%28pdf%29.> )

For your convenience I will also attach the report to this email.

This is our full and complete agreement.

**We have fulfilled our side of the agreement and as we have repeatedly said to you, you need to fulfill your side of the agreement and deposit the \$200,000 in the Byron New Energy Charitable Trust account:**
