## E-Cat Commercialization in the Americas

27 June 2011, 13:18

New York – AmpEnergo Inc. along with Leonardo Corporation and the inventor Dr. Andrea Rossi are working on commercializing the E-Cat (Energy Catalyzer) technology in the Americas, including North America, Central America, South America, and the Caribbean. Current efforts involve setting up strategic financial and business partnerships and negotiating licensing agreements with interested parties. At the present time AmpEnergo Inc. is not offering stock to the general public, but we appreciate the many inquiries and words of support we have received. We look forward to bringing this world changing energy technology to market and will keep you informed of future developments.
