[ROTHWELL UPLOAD ANNOUNCEMENT TO VORTEX OF MELICH PAPER WITH
ROTHWELL'S ATTRIBUTION AS EDITOR]

Re: [Vo]:Brief Description of the Calorimetry in the Rossi Experiment at U. Bologna,
January 14, 2011
Jed Rothwell
Mon, 17 Jan 2011 08:21:08 -0800

I revised the H2 flow measurement part already.

The first report I will upload today is by Melich. This week or next we should have one
by
Prof. Levi.

[MILES SENDS KRIVIT A DIFFERENT VERSION OF THE MELICH PAPER,
WITHOUT ROTHWELL'S ATTRIBUTION ON IT.]

Steven,

I don't know if this should be kept confidential, hence I don't want to give out names.
However, the same person that asked me to do the calculation on Sunday also sent me
the report on Monday. I do not know if this person wrote the report or had others
helping. I was told that several other unnamed people were being asked to do the same
calculation. It looks like we were in close agreement with our results. If the numbers are
correct, then there was a large excess enthalpy effect. I think the numbers came directly
from the demonstration in Italy.

I would now like to try a co-deposition experiment with nickel if this is really a Ni/H2
effect.

Mel Miles

You wrote:

You published this paper on your website with no authorship attributions. Instead, you only listed your name as the "editor."

Yup. As I recall, I did not write any of it.

Was your source for this [see message below] Melich?

Probably. I don't recall. Various people contributed. Why does it matter? Who cares?

- Jed

[KRIVIT CONFIRMS MILES' SOURCE OF THE REPORT AS MELICH]

At 09:58 AM 3/22/2016, you wrote:

Steven,

Yes- I did the calculations at the request of Mike Melich, and the calculations were correct based on the information given. Two others also did calculations and obtained similar results. Jed Rothwell was one of the two and obtained results about the same as mine. I don't know the name of the third person. As far as I know, Jed wrote this article as listed. It was up to Jed to name others who did the calculations, but this was not my report, and my name did not need to be listed. I always thought that Jed was the main author of this report, but Mike Melich may have added comments. You need to ask Jed because I don't know.
