**Carbon Neutralize Your  
Enviro Event For Free**

Planktos will make non-profit  
events carbon neutral for free.

**Ecosystem Restoration**

Planktos' CO<sub>2</sub> emission offsets  
are created via Planktos ocean  
restoration and KlimaFa forest  
restoration projects.

## Mother Nature's Ecosystem Restoration Store

Help Planktos green your carbon footprint by replanting trees, cleansing skies, and reviving starving seas. The Choice is Yours Today! There are many ways to lessen the CO<sub>2</sub> in our skies, but doesn't rescuing the worst-hit communities seem to be the most merciful, sane, and urgent thing to do?

Shrinking your carbon footprint with ecosystem restoration credits will help revive vital ecosystems, habitats, and failing food chains worldwide. To begin cleansing the skies, greening the hills, and feeding the seas, select a product type below.

**Homes**

Big house or small, most of our personal CO<sub>2</sub> emissions come from our homes. You can zero them out completely here.

**Vehicles**

Until we're all scooting around in solar or solar-sourced hydrogen vehicles, our cars and trucks will always be CO<sub>2</sub> headaches for the Earth. Clean up your act here.

**Air Travel**

It feels so fine to soar aloft and leave land speed far behind. Unhappily we can't outrace the CO<sub>2</sub> our graceful craft still spew. Zero out your aerial litter here.

**Mother Nature**

For those of you who commute by bicycle, lead low-impact lives, or just want to do more. Please click here to donate CO<sub>2</sub> offsets to Mother Nature.

**Events**

Planktos offers free offsets for many environmental events and attractive rates for conferences, weddings, concerts, rallies, etc. Please click here to inquire...

**Businesses**

For companies, businesses, or other institutions seeking to reduce their annual greenhouse gas 'footprint'. Please click here to inquire...

**Gift Purchases**

Carbon neutralize your friends and family this year. Planktos carbon offsets are a unique way to show you care and the perfect way to slow climate change.

### Carbon Footprints Stifle Life

Our carbon footprint is the sum of the carbon dioxide emissions from all our daily activities. The CO<sub>2</sub> impact from our vehicles, homes, and businesses is quickening global warming, dangerously acidifying the oceans, and

### Suggestions Welcome

starving the tiny marine plankton plants that produce half Earth's oxygen and feed all life in the sea.

### Planktos Ecorestoration Heals

Planktos, Inc. creates climate forest parks and replenishes stricken plankton blooms to heal green ecosystems and carbon cleanse the skies. Simply restoring the marine plankton we've killed off since 1980 could regenerate tens of billions of tons of lost ocean nourishment for fisheries, birds, and whales. It can also sink and sequester billions of tons of CO<sub>2</sub> each year, or about half of mankind's carbon spew today. Just as in new woodlands, this CO<sub>2</sub> disappears from the atmosphere for centuries or more, and can be traded as CO<sub>2</sub> offsets to sustain the rescue work.
